ACP45CA1 | Targus Universal Docking Station w/ Digital Audio

The Targus Universal Docking Station w/ Digital Audio is designed to connect to any laptop with a USB port. Simply plug in the USB cable to connect a network, keyboard, mouse, printer, speakers or other external peripherals. The digital audio connection transforms your DVDs or music into virtual surround sound for an in-home theater experience. Other unique features include two high-power USB ports providing twice as much power as a standard USB port, which allows you to connect USB devices with higher power requirements. The Universal Docking Station also includes anti-theft slot locks enabling the user to attach a Targus DEFCON® Security Cable Lock for added security. The innovative ID design allows for natural cooling of the laptop and provides an ergonomic and comfortable typing platform.

Includes builtin digital audio for virtual 7.1 surround sound, 2 highspeed USBports and antitheft lock slots for added security

Universal design with onetouch USB connection

Ergonomic design for cooling and comfort; also includes slipresistant rubber pads

1 Serial, 1 Parallel, 1 Ethernet (10100BaseT), and 2 PS2 ports

1 microphone, 1 speaker, and 1 SPDIF (digital audio) output

Windows Vista ready; also supports Windows 2000, and XP operating systems; includes signed Vista drivers

Yes
